

Expanding your business internationally is an ongoing challenge that requires careful planning. Fitzgerald and Law provide you with business advice and support as you grow, develop and change, in line with your international business strategy.

## Corporate Assurance and Advisory

*"We're good people to work with – relaxed in our approach, but professional in our conviction"*

**Dominic Fiore**

International legislative frameworks vary immensely and expanding businesses face very different financial reporting requirements overseas to those they encounter at home. We advise you on what to expect and help you keep to deadlines, making international expansion effortless and efficient.

Ensuring that your business meets financial reporting requirements is vital to gaining a competitive advantage in foreign jurisdictions.

F&L's Corporate Assurance and Advisory team offer financial support and advice at key strategic points as you set up and grow your business.

We'll guide you clearly and concisely through the reporting legislation in your chosen country of operation, to ensure that you meet audit criteria which are often very different to headquarters requirements. We maintain open communication channels so that you are informed and involved every step of the way, so you can focus on the present as well as plan for the future.

F&L manage and mitigate your compliance risk by ensuring reporting deadlines are met. Our expertise covers companies legislation in the UK and Ireland, international auditing standards, UK and Irish GAAP, IFRS, US GAAP and the compliance requirements of your parent company, particularly SOX issues.

As your business reaches maturity we can carry out regular health checks and advise you on how to improve your financial reporting and minimise your risk in line with where your business is going. We'll help you develop ongoing KPIs and handle expansion or exit when the time comes for you to explore other areas of operation, keeping you on track whatever your international aspirations.
