

Businesses never stand still and getting the right advice as you grow, change and develop is key to achieving success. Fitzgerald and Law work hand in hand with UK businesses to help them get where they need to be, reviewing and re-evaluating what's best for your organisation at every stage of its life.

## Corporate Assurance and Advisory

*"We see ourselves as partners in your business, helping you to act decisively in financial matters so that you can focus on achieving your business goals."*

**Dominic Fiore**

No-one knows your business better than you do but sometimes making sure it stays on track financially can be a full-time job, taking you away from moving your business forward.

F&L's Corporate Assurance and Advisory team get to know businesses inside out and work collaboratively with them to make sure they comply with UK financial reporting, achieving financial efficiency at every stage of their development.

We'll keep you up to date with all your financial reporting deadlines from day-to-day accounting to audit, measure success with robust business forecasting and KPIs and help you plan ahead.

Our multi-disciplinary approach means we can also offer legal and tax advice and provide all the services you need to understand and fulfil your obligations and potential.

To maintain the health of your business we review and reassess your structure, plans and processes at key stages of growth to reassure you that, as you expand, re-structure or even sell on your business, it's exactly as planned.
